The Linguistics department is known internationally for its strength in the areas of second language acquisition, applied linguistics, TESOL, and American Indian languages. Like many linguistics programs in the United States, the department is centrally concerned with core areas of linguistic theory. It also emphasizes the importance of the applied and descriptive endeavors. The areas of expertise of the faculty are theoretical and descriptive linguistics, Hispanic linguistics, sociolinguistics, psycholinguistics, and second language acquisition. The department has a good student-faculty ratio and prides itself on its collegial atmosphere and close cooperation between faculty and students.

A major in linguistics gives students a solid foundation in the central areas of linguistic theory and analysis. The structure of human language (its sounds, word structures, and syntax) is the focus of the linguistics courses required for the major. Additionally, the major’s language requirement ensures that students acquire a perspective on linguistic structures outside of their native language, and that they receive some exposure to at least one language that is structurally unlike English. Students considering a major in linguistics should take the introductory linguistics course (LING 1000, formerly LING 1950) at their earliest opportunity to gauge if the major is right for them.

In addition to formal instruction provided by the department, students are encouraged to take courses in related departments such as anthropology and psychology. Students who wish to combine their work in linguistics with training in a specific cultural area may simultaneously earn a certificate in Asian, Latin American, Russian and East European, West European, or European Union Studies through the University Center for International Studies (UCIS). The department is also home to the English Language Institute, the Robert Henderson Language Media Center, and the Less-Commonly-Taught Languages Center.

Careers in linguistics include teaching English as a second language and other languages including American Sign Language; computational linguistics research in industry and public agencies; field research on endangered languages and cultures; research and teaching at the university level; careers in publishing and advertising; speech pathology and rehabilitation; translation and interpreting; law; and governmental consulting on language policies. Most careers in linguistics require graduate training.

**Required courses for the Linguistics major**
The linguistics major requires the completion of 30 credits in linguistics distributed as follows.

**Core courses**
LING 1000 Introduction to Linguistics (formerly LING 1950)
LING 1578 Phonetics and Phonemics
LING 1579 Phonology
LING 1773 Morphology
LING 1777 Syntactic Theory

**One of the following**
LING 1267 Aspects of Sociolinguistics
LING 1580 Language and the Mind
LING 1682 Introduction to Semantics
LING 1860 Introduction to Historical Linguistics

**One of the following**
LING 1441 Field Methods in Linguistics
LING 2144 Research Methods in Applied Linguistics
LING 2441 Field Methods in Linguistics

**Capstone Course**
One of the following
LING 1903 Directed Research
LING 1930 Introduction to Applied Linguistics

**Elective courses**
Students are required to complete two LING 1000-level elective courses.

**Language course**
Students are required to complete one semester of language study that is not Romance (including Latin), Germanic, Balto-Slavic, or Greek. This requirement is in addition to one or two terms of language study required of those who are not exempt from the foreign language requirement for the School of Arts and Sciences.

**Grade requirements:** A minimum GPA of 2.0 in departmental courses is required for graduation.
Satisfactory/No Credit option: No more than two LING courses that count toward the major can be taken on an S/NC basis.

Writing (W) requirement: Students must complete at least one W-course in the major.

Related area: A minimum of 12 credits is required in any one Arts and Sciences department chosen in consultation with the major advisor. The completion of an official Arts and Sciences minor or an Arts and Sciences or UCIS certificate also satisfies this requirement.
